STATEMENT OF DIRECTORS' RESPONSIBILITY

The Companies Act 2019 (Act 992) requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company at the end of the financial year and of the income statement for that year.

The directors believe that in preparing the unaudited financial statements, they have used appropriate accounting policies, consistently applied and supported by reasonable and prudent judgements, and estimates and that all international accounting standards which they consider to be appropriate have been followed.

The directors are responsible for ensuring that the Company keeps accounting records which disclose with reasonable accuracy the financial position of the Company and which enable them to ensure that the financial statements comply with the Companies Act, 2019 (Act 992) and Insurance Act 2021 (Act 1061).

The Company is a limited liability Company incorporated and domiciled in Ghana, with its registered office at Nyemitei House 28/29 Ring Road East Osu-Accra. SIC Insurance Company Limited has a primary listing on the Ghana Stock Exchange.

2. Basis of preparation

(a) Statement of compliance

The financial statements are prepared in compliance with International Financial Reporting Standards (IFRS) and Interpretations of those Standards, as adopted by the International Accounting Standards Board and applicable legislations.

The following accounting standards, interpretations and amendments to published accounting standards that impact on the operations of the Company were adopted:

IFRS 4 Insurance contracts;

IFRS 7 Financial Instruments: Disclosures:

IFRS 15 Revenue

IFRS 16 Leases

IAS 1 (*Revised*), Presentation of financial statements (added disclosures about an entity's capital and other disclosures);

IAS 14 Segment reporting;

IAS 16 Property, plant and equipment;

IAS19 (Amendment), Employee benefits;

IAS 21 (Amendment), The effects of changes in foreign exchange rates;

IAS 24 (Amendment), Related party disclosures;

IAS 32 (Amendment), Financial instruments: disclosure and presentation;

IAS 36 Impairment of assets;

IAS 37 Provisions, contingent liabilities and contingent assets;

IAS 38 Intangible assets:

IAS 39 (Amendment), Financial instruments: recognition and measurement; and

IAS 40 Investment properties.

(b) Basis of measurement

The financial statements have been prepared on the historical cost basis except for available-for-sale financial assets which are measured at fair value. Financial assets are held at fair value through profit and loss, investment property is measured at fair value, retirement benefit obligations and other long term employee benefit are measured at net present value, financial assets and liabilities are initially recognised at fair value.

(c) Use of estimates and judgement

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and the future periods if the revision affects both current and future periods.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

3. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements by the Company

(a) Consolidation

i). Subsidiaries:

Subsidiaries are all entities over which the Company has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Company. They are de-consolidated from the date on which control ceases.

The Company uses the purchase method of accounting to account for the acquisition of subsidiaries. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of acquisition over the fair value of the Company's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the income statement.

Intra-Company transactions, balances and unrealised gains on intra - group transactions are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Subsidiaries' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Company.

ii). Associates:

Associates are all entities over which the Company has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for by the equity method of accounting and are initially recognised at cost.

Unrealised gains on transactions between the Company and its associates are eliminated to the extent of the Company's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Associates' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Company.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

(b) Segment reporting

A business segment is a Company of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and return that are different from those of segments operating in other economic environments.

(c) Foreign currency translation

i). Functional and presentation currency:

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the entity operates (the 'functional currency'). The financial statements are presented in Ghana cedis, which is the Company's presentation currency.

ii). Transactions and balances:

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

Translation differences on non-monetary items, such as equities held at fair value through profit or loss, are reported as part of the fair value gain or loss. Translation differences on non-monetary items, such as equities classified as available-for-sale financial assets, are included in the fair value reserve in equity.

iii). Exchange differences:

- (i) assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position; and
- (ii) income and expenses for each statement of comprehensive income are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions).

(d) Property, plant and equipment

Land and buildings comprise mainly outlets and offices occupied by the Company. Land and buildings are shown at fair value, based on periodic, but at least triennal, valuations by external independent appraisers, less subsequent depreciation for buildings. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset. All other property, plant and equipment are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of comprehensive income during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of land and buildings are credited to the revaluation surplus in shareholders' funds. Decreases that offset previous increases of the same asset are charged against revaluation surplus directly in equity; all other decreases are charged to the statement of comprehensive income.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost or revalued amounts over their estimated useful lives, as follows:

| Motor vehicles | 20% | per annum |
|---------------------|-----|-----------|
| Office furniture | 10% | " |
| Household furniture | 20% | " |
| Freehold buildings | 1% | " |
| Office equipment | 20% | " |
| Computers | 25% | " |

Leasehold land & buildings are amortised over the life of the lease.

The assets' residual values and useful lives are reviewed at each statement of financial position date and adjusted if appropriate.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the statement of comprehensive income. When revalued assets are sold, the amounts included in the revaluation surplus are transferred to retained earnings.

(e) Investment properties

Property held for long-term rental yields, that is not occupied by any unit, subsidiary or associate of the Company is classified as investment property.

Investment property comprises freehold land and buildings. It is carried at fair value. Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If this information is not available, the Company uses alternative valuation methods such as discounted cash flow projections or recent prices on less active markets. Investment property that is being redeveloped for continuing use as investment property, or for which the market has become less active, continues to be measured at fair value.

Changes in fair values are recorded in the statement of comprehensive income.

Property located on land that is held under operating lease is classified as investment property as long as it is held for long-term rental yields and is not occupied by the Company. The initial cost of the property is the lower of the fair value of the property and the present value of the minimum lease payments. The property is carried at fair value after initial recognition.

If an investment property becomes owner-occupied, it is reclassified as property, plant and equipment, and its fair value at the date of reclassification becomes its cost for subsequent accounting purposes.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

If an item of property, plant and equipment becomes an investment property because its use has changed, any difference arising between the carrying amount and the fair value of this item at the date of transfer is recognised in equity as a revaluation of property, plant and equipment. However, if a fair value gain reverses a previous impairment loss, the gain is recognised in the statement of comprehensive income. Upon the disposal of such investment property, any surplus previously recorded in equity is transferred to retained earnings; the transfer is not made through the statement of comprehensive income.

(f) Financial Instrument

Financial assets and financial liabilities are recognised in the Group's statement of financial position when the Group becomes a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

(i) Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are measured subsequently in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

ii). Classification of financial assets

Debt instruments that meet the following conditions are measured subsequently at amortised cost:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

Debt instruments that meet the following conditions are measured subsequently at fair value through other comprehensive income (FVTOCI):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).

Despite the foregoing, the company may make the following irrevocable election/designation at initial recognition of a financial asset:

- the company may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met (see (iii) below); and
- the company may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch (see (iv) below).

(g) Impairment of assets

i). Financial assets carried at amortised cost:

The Company assesses at each statement of financial position date whether there is objective evidence that a financial asset or Company of financial assets is impaired. A financial asset or Company of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or Company of financial assets that can be reliably estimated. Objective evidence that a financial asset or Company of assets is impaired includes observable data that comes to management's attention about the following events:

- (i) significant financial difficulty of the issuer or
- (ii) a breach of contract, such as a default or delinquency in payments;
- (iii) it becoming probable that the issuer or debtor will enter bankruptcy or other financial reorganisation;
- (iv) the disappearance of an active market for that financial asset bacause of financial difficulties; or
- (v) observable data indicating that there is a measurable decrease in the estimated future cash flow from a Company of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the Company, including:
- · Adverse changes in the payment status of issuers or debtors in the Company; or
- National or Local economic conditions that correlate with defaults on the assets in the Company.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

If there is objective evidence that an impairment loss has been incurred on loans and receivables or held-to-maturity investments carried at amortised cost, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the statement of comprehensive income. If a held-to-maturity investment or a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under contract. As a practical expedient approach, the Company may measure impairment on the basis of an instrument's fair value using an observable market price.

ii). Financial assets carried at fair value:

The Company assesses at each statement of financial position date whether there is objective evidence that an available-for-sale financial asset is impaired, including in the case of equity investments classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and current fair value, less any impairment loss on the financial asset previously recognised in profit or loss – is removed from equity and recognised in the statement of comprehensive income. Impairment losses recognised in the statement of comprehensive income on equity instruments are not subsequently reversed. The impairment loss is reversed through the statement of comprehensive income, if in a subsequent period the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss.

iii). Impairment of other non-financial assets:

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are companied at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

(h) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the state of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(i) Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts.

(j) Share capital

Shares are classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of equity instruments are shown in equity as a deduction from the proceeds, net of tax. Incremental costs directly attributable to the issue of equity instruments as consideration for the acquisition of a business are included in the cost of acquisition.

(k) Insurance and investment contracts - classification

The Company issues contracts that transfer insurance risk or financial risk or both.

Insurance contracts are those contracts that transfer significant insurance risk. Such contracts may also transfer financial risk. As a general guideline, the Company defines as significant insurance risk the possibility of having to pay benefits on the occurrence of an insured event that are at least 10% more than the benefits payable if the insured event did not occur.

Investment contracts are those contracts that transfer financial risk with no significant insurance risk.

(1) Insurance contracts

i). Recognition and measurement:

Insurance contracts are classified into categories, depending on the duration of risk and whether or not the terms and conditions are fixed.

ii). Non-life insurance contracts:

These contracts are casualty, property and personal accident insurance contracts.

Casualty insurance contracts protect the Company's customers against the risk of causing harm to third parties as a result of their legitimate activities. Damages covered include both contractual and non-contractual events. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employees (employers' liability) and for individual and business customers who become liable to pay compensation to a third party for bodily harm or property damage (public liability).

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

Property insurance contracts mainly compensate the Company's customers for damage suffered to their properties or for the value of property lost. Customers who undertake commercial activities on their premises could also receive compensation for the loss of earnings caused by the inability to use the insured properties in their business activities (business interruption cover).

Personal accident insurance contracts mainly compensate the policy holder for bodily injuries suffered. It can be extended to family members and employees of the insured.

For all these contracts, premiums are recognised as revenue (earned premiums) proportionally over the period of coverage. The portion of premium received on in-force contracts that relates to unexpired risks at the statement of financial position date is reported as the unearned premium liability. Premiums are shown before deduction of commission.

Claims and loss adjustment expenses are charged to statement of comprehensive income as incurred based on the estimated liability for compensation owed to contract holders or third party properties damaged by the contract holders. They include direct and indirect claims settlement costs arising from events that have occurred up to the statement of financial position date event if they have not yet been reported to the Company. The Company does not discount its liabilities for unpaid claims other than for disability claims. Liabilities for unpaid claims are estimated using the input of actuaries and assessments for individual cases reported to the Company and statistical analyses for the claims incurred but not reported, and to estimate the expected ultimate cost of more complex claims that may be affected by external factors (such as court decisions).

iii). Liability adequacy test:

At each statement of financial position date, liability adequacy tests are performed to ensure the adequacy of the contract liabilities. In performing these tests, current best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities, are used. Any deficiency is immediately charged to profit or loss and by subsequently establishing a provision for losses arising from liability adequacy tests (the unexpired risk provision).

In determining the adequacy of unearned premium, the liability adequacy test on unexpired risk premium was determined by computing the premium unearned on each policy as at 31 December 2019. Liability adequacy test in respect of claims is determined by taking the settled amount for each claim, agreed with the claimant. The sum insured is considered the best test for non-settled claims.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

iv). Reinsurance contracts held:

Contracts entered into by the company with reinsurers under which the company is compensated for losses on one or more contracts issued by the company and that meet the classification requirements for insurance contracts which are classified as reinsurance contracts held. Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the company under which the contract holder is another insurer (inwards reinsurance) are included with insurance contracts.

The benefits to which the company is entitled under its reinsurance contracts held are recognised as reinsurance assets. These assets consist of short-term balances due from reinsurers (classified within loans and receivables), as well as longer term receivables (classified as reinsurance assets) that are dependent on the expected claims and benefits arising under the related reinsured insurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as an expense when due.

In certain cases, a reinsurance contract is entered into retrospectively to reinsure a notified claim under the company's property or casualty insurance contracts. Where the premium due to the reinsurer differs from the liability established by the company for the related claim, the difference is amortised over the estimated remaining settlement period.

v). Receivables and payables related to insurance contracts:

Receivables and payables are recognised when due. These include amounts due to and from agents, brokers and insurance contract holders. If there is objective evidence that the insurance receivable is impaired, the company reduces the carrying amount of the insurance receivable accordingly and recognises that impairment loss in the statement of comprehensive income

Vi). Salvage and subrogation reimbursements:

Some insurance contracts permit the company to sell (usually damaged) property acquired in settling a claim (i.e., salvage). The company may also have the right to pursue third parties for payment of some or all costs (i.e., subrogation).

Estimates of salvage recoveries are included as an allowance in the measurement of the insurance liability for claims, and salvage property is recognised in other assets when the liability is settled. The allowance is the amount that can reasonably be recovered from the disposal of the property.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

Subrogation reimbursements are also considered as an allowance in the measurement of the insurance liability for claims and are recognised in other assets when the liability is settled. The allowance is the assessment of the amount that can be recovered from the action against the liable third party.

(m) Deferred tax

Deferred tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, if the deferred tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss, it is not accounted for. Deferred tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the statement of financial position date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the Company controls the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

(n) Employee benefits

i). Pension obligations:

The Company operate various pension schemes. The schemes are generally funded through payments to trustee-administered funds, determined by periodic actuarial calculations. The Company has both defined benefit and defined contribution plans. A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. A defined contribution plan is a pension plan under which the Company pays fixed contributions into a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

For defined contribution plans, the Company pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

ii). Other post-employment obligations:

The Company provides post-retirement healthcare benefits to their retirees. The entitlement to these benefits is usually conditional on the employee remaining in service up to retirement age. The cost is expensed in the statement of comprehensive income when incurred.

iii). Termination benefits:

Termination benefits are payable when employment is terminated before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits when it is demonstrably committed to either: terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after the statement of financial position date are discounted to present value.

(o) Provisions

i). Restructuring costs and legal claims:

Provisions for restructuring costs and legal claims are recognised when: the Company has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Restructuring provisions comprise lease termination penalties and employee termination payments. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

(p) Revenue recognition

Revenue comprises the fair value for services, net of value-added tax, after eliminating revenue within the Company. Revenue is recognised as follows:

i). Premiums:

Written premiums for non-life insurance business comprise the premiums on contracts incepting in the financial year. Written premiums are stated gross of commissions payable to intermediaries.

Unearned premiums are those proportions of the premium which relate to periods of risk after the statement of financial position date. Unearned premiums are calculated on the basis of the number of days beyond the statement of financial position date.

ii). Investment income:

Investment income consists primarily of dividends and interest receivable

iii). Fee, commission and other income:

Fee, commission and other income consists primarily of reinsurance and profit commissions, asset management fees, policyholder administration fees and other contract fees.

iv). Interest income:

Interest income for financial assets that are not classified as fair value through profit or loss is recognised using the effective interest method. When a receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument and continues unwinding the discount as interest income.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

v). Dividend income:

Dividend income for available-for-sale equities is recognised when the right to receive payment is established – this is the ex-dividend date for equity securities.

vi). Rental income:

Rental income is recognised on an accrual basis.

(q) Leases

The Company assesses whether a contract is or contains a lease, at inception of the contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable.

Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date.

The amount expected to be payable by the lessee under residual value guarantees.

The exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and

Payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date.

The amount expected to be payable by the lessee under residual value quarantees.

The lease liability is presented as a separate line in the consolidated statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

The Company re-measures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.

The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).

A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is re-measured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Company did not make any such adjustments during the periods presented. The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the Company incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under IAS 37. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Company expects to exercise a purchase option, the related right-of-use asset

is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the consolidated statement of financial position.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

The Company applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property, Plant and Equipment' policy.

Variable rents that do not depend on an index or rate are not included in the measurement the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs and are included in the line "Other expenses" in profit or loss.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Company has not used this practical expedient. For a contract that contain a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

IFRS 16 does not change substantially how a lessor accounts for leases. Under IFRS 16, a lessor continues to classify leases as either finance leases or operating leases and account for those two types of leases differently.

However, IFRS 16 has changed and expanded the disclosures required, in particular with regard to how a lessor manages the risks arising from its residual interest in leased assets. Under IFRS 16, an intermediate lessor accounts for the head lease and the sub-lease as two separate contracts.

The intermediate lessor is required to classify the sub-lease as a finance or operating lease by reference to the right-of-use asset arising from the head lease (and not by reference to the underlying asset as was the case under IAS 17

Because of this change, the Company has reclassified certain of its sub-lease agreements as finance leases. As required by IFRS 9, an allowance for expected credit losses has been recognised on the finance lease receivables.

For tax purposes the Company receives tax deductions in respect of the right-of-use assets and the lease liabilities in a manner consistent with the accounting treatment.

The application of IFRS 16 has an impact on the consolidated statement of cash flows of the Company.

Under IFRS 16, lessees must present:

- Short-term lease payments, payments for leases of low-value assets and variable lease payments not included in the measurement of the lease liability as part of operating activities:
- Cash paid for the interest portion of a lease liability as either operating activities or financing activities, as permitted by IAS 7 (the Company has opted to include interest paid as part of financing activities); and
- Cash payments for the principal portion for a lease liability, as part of financing activities.
 Under IAS 17, all lease payments on operating leases were presented as part of cash flows from operating activities

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

(r) Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividends are approved by shareholders.

(s) Critical accounting estimates and judgments in applying accounting policies

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The ultimate liability arising from claims made under insurance contracts:

The estimation of the ultimate liability arising from claims made under insurance contracts is the Company's most critical accounting estimate. There are several sources of uncertainty that need to be considered in the estimate of the liability that the Company will ultimately pay for such claims.

ii). Impairment of available-for-sale equity financial assets:

The Company determines that available-for-sale equity financial assets are impaired when there has been a significant or prolonged decline in the fair value below its cost. This determination of what is significant or prolonged requires judgment. In making this judgment, the Company evaluates among other factors, the normal volatility in share price, the financial health of the investee, industry and sector performance, changes in technology and operational and financing cash flow. Impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology, and financing and operational cash flows.

(t) Management of insurance and financial risk

The Company issues contracts that transfer insurance risk or financial risk or both. This section summarises these risks and the way the Company manages them.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

i). Insurance risk:

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the estimate established using statistical techniques.

ii). Sources of uncertainty in the estimation of future claim payments:

Claims on casualty contracts are payable when the insured event occurs. The Company is liable for all insured events that occur during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time and larger variables affect the amount and timing of cash flows from these contracts. These mainly relate to the inherent risks of the business activities carried out by individual contract holders and the risk management procedures they adopt. The compensation paid on these contracts is the monetary awards granted for bodily injury suffered by employees (for employer's liability covers) or members of the public (for public liability covers). Such awards are lump-sum payments that are calculated as the present value of the lost earnings and rehabilitation expenses that the injured party will incur as a result of the accident.

The estimated cost of claims includes direct expenses to be incurred in settling claims, net of the expected subrogation value and other recoveries. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposure. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established. The liability for these contracts comprise a provision for IBNR, a provision for reported claims not yet paid and a provision for unexpired risks at the statement of financial position date. The amount of casualty claims is particularly sensitive to the level of court awards and to the development of legal precedent on matters of contract and tort. Casualty contracts are also subject to the emergence of new types of latent claims, but no allowance is included for this at the statement of financial position date.

In calculating the estimated cost of unpaid claims (both reported and not), the Company estimation techniques are a combination of loss-ratio-based estimates (where the loss ratio is defined as the ratio between the ultimate cost of insurance claims and insurance premiums earned in a particular financial year in relation to such claims) and an estimate based upon actual claims experience using predetermined formulae where greater weight is given to actual claims experience as time passes.

The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Company, where information about the claim event is available. IBNR claims may not be apparent to the insured until many years after the event that gave rise to the claims has happened. For casualty contracts, the IBNR proportion of the total liability is high and will typically display greater variations between initial estimates and final outcomes because of the greater degree of difficulty of estimating these liabilities.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

In estimating the liability for the cost of reported claims not yet paid the Company considers any information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. Large claims are assessed on a case-by-case basis or projected separately in order to allow for the possible distortive effect of their development and incidence on the rest of the portfolio.

Where possible, the Company adopts multiple techniques to estimate the required level of provisions. This provides a greater understanding of the trends inherent in the experience being projected. The projections given by the various methodologies also assist in estimating the range of possible outcomes. The most appropriate estimation technique is selected taking into account the characteristics of the business class and the extent of the development of each accident year.

iii). Financial risk:

The Company is exposed to financial risk through its financial assets, financial liabilities (investment contracts and borrowings), reinsurance assets and insurance liabilities. In particular the key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important components of this financial risk are interest rate risk, equity price risk, currency risk and credit risk.

These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements. The risk that the Company primarily faces due to the nature of its investments and liabilities is interest rate risk.

a). Interest rate risk:

Interest-rate risk is the only financial risk that has a materially different impact across the assets and liabilities categorised in the Company's assets and liabilities management (ALM) framework.

The sensitivity analysis below has been determined based on the exposure to interest rates for non-derivative instruments at the balance sheet date.

A 5% increase or decrease is used when reporting interest rate risk internally, it represents managements assessment of the reasonably possible change in interest rates.

| | 5% change in | 30 Sept 2021 | Scenario 1 | Scenario 2 |
|-----------------------|---------------|--------------|-------------|-------------|
| | interest rate | Amount | 5% increase | 5% decrease |
| | GH¢ | GH¢ | GH¢ | GH¢ |
| Pre-tax profit/(Loss) | 763,038 | 15,260,757 | 16,023,795 | 14,497,719 |
| Shareholders' equity | 14,807,359 | 296,147,177 | 310,954,536 | 281,339,818 |
| | 5% change in | 30 Sept 2020 | Scenario 1 | Scenario 2 |
| | interest rate | Amount | 5% increase | 5% decrease |
| | GH¢ | GH¢ | GH¢ | GH¢ |
| Pre-tax profit/(Loss) | 419,645 | 8,392,906 | 8,812,552 | 7,973,261 |
| Shareholders' equity | 13,647,036 | 272,940,719 | 286,587,755 | 259,293,683 |

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

Assuming no management actions, a series of such rises would increase pre-tax profit/loss for Sept 2021 by **GH¢763,038** while a series of such falls would decrease pre-tax profit/loss for Sept 2021 by **GH¢763,038**. Also a series of such rises would increase the shareholders' equity by **GH¢14,807,359** whilst a series of such falls would decrease shareholders' equity by **GH¢14,807,359**.

b). Credit risk:

The Company has exposure to credit risk, which is the risk that counterparty will be unable to pay amounts in full when due. Key areas where the Company is exposed to credit risk are:

- reinsurers' share of insurance liabilities,
- amounts due from reinsurers in respect of claims already paid,

The Company structures the levels of credit risk it accepts by placing limits on its exposure to a single counterparty, or groups of counterparty, and to geographical and industry segments. Such risks are subject to an annual or more frequent review. Limits on the level of credit risk by category and business lines are approved by the Board of Directors.

Maximum exposure to credit risk before collateral held

The company's maximum exposure to credit risk at 31 December 2020 nd 2019 is the same as the balances of the various financial assets in the statement of financial position listed below

| | 2021 | 2020 |
|-----------------------------|-------------------------|-------------|
| | $\mathbf{GH}\mathbf{c}$ | GH c |
| Short term investments | 98,153,030 | 82,804,137 |
| Trade and other receivables | 39,007,301 | 21,231,345 |
| Cash and bank balances | 71,480,651 | 32,444,326 |
| | 208,640,983 | 136,479,808 |

No assets have been impaired at the end of the reporting period.

c). Liquidity risk:

The Company is exposed to daily calls on its available cash resources mainly from claims arising from insurance contracts. Liquidity risk is the risk that cash may not be available to pay obligations when due at a reasonable cost. The Company's approach to managing liquidity risk is to ensure that it will maintain adequate liquidity to meets its liabilities when due. Please refer to note 18 for the details of the insurance liabilities which may have an impact on the liquidity risk.

The table below presents the cash flows payable by the company under financial liabilities by remaining contractual maturities at the balance sheet date.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

Maturity analysis of financial assets and liabilities

| | Carrying | | More than one | | |
|----------------------------------|-------------|----------------|---------------|-------------|-------------|
| 2021 | amount | Up to one year | year | 2021 Total | 2020 Total |
| | GH c | GH c | GH c | GH¢ | GH c |
| Financial assets | | | | | |
| Short term investments | 98,153,030 | 98,153,030 | - | 98,153,030 | 82,804,137 |
| Other receivables | 39,007,301 | 39,007,301 | - | 39,007,301 | 21,231,345 |
| Unearned reinsurance premium | 46,414,111 | 46,414,111 | - | 46,414,111 | 29,144,581 |
| Cash and bank balances | 71,480,651 | 71,480,651 | - | 71,480,651 | 32,444,326 |
| Total undiscounted assets | 255,055,094 | 255,055,094 | - | 255,055,094 | 165,624,389 |
| Financial liability | | | | | |
| Bank overdraft | 5,273,370 | 5,273,370 | - | 5,273,370 | 5,851,660 |
| Insurance contract liabilities | 146,759,404 | 146,759,404 | - | 146,759,404 | 118,683,679 |
| Borrowings | 15,645,941 | 15,645,941 | - | 15,645,941 | - |
| Trade and other accounts payable | 66,559,907 | 66,559,907 | - | 66,559,907 | 28,779,360 |
| Total undiscounted liabilities | 234,238,622 | 234,238,622 | - | 234,238,622 | 153,314,700 |
| Total liquidity gap | 20,816,472 | 20,816,472 | - | 20,816,472 | 12,309,690 |

d). Currency risk:

The Company operates locally and its exposures to foreign exchange risk arise primarily with respect to the US dollar, the Euro and the UK pound due to the reinsurance businesses undertaken with foreign based Reinsurers as well as policies undertaken in foreign currencies. The Company receives claims from its reinsurers in foreign currencies and also has some investments in foreign currencies which mitigates the foreign currency exchange rate risk for these operations.

As a result, foreign exchange risk arises from recognised assets and liabilities denominated in other currencies.

The following table details the Company's sensitivity to a 10% increase and decrease in the cedi against the relevant foreign currencies. A 10% sensitivity rate is used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. For each sensitivity the impact of change in a single factor is shown, with other assumptions unchanged.

| | 10% change in | 30 Sept 2021 | Scenario 1 | Scenario 2 |
|----------------------|----------------------|---------------|---------------------|---------------------|
| 2021 | exchange rate GH¢ | Amount GH¢ | 10% increase GH¢ | 10% decrease GH¢ |
| Pre-tax profit | 1,526,076 | 15,260,757 | 16,786,833 | 13,734,681 |
| Shareholders' equity | 29,614,718 | 296,147,177 | 325,761,894 | 266,532,459 |
| | 10% change in | 30 Sept 2020 | Scenario 1 | Scenario 2 |
| | exchange rate | Amount | 10% increase | 10% decrease |
| 2020 | $\mathrm{GH} c$ | GH c | GH c | GH c |
| Pre-tax profit | 839,291 | 8,392,906 | 9,232,197 | 7,553,616 |
| Shareholders' equity | 27,294,072 | 272,940,719 | 300,234,791 | 245,646,647 |

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

Assuming no management actions, a series of such rises would increase pre-tax profit/loss for Sept 2021 by **GH¢1,526,076** while a series of such falls would decrease pre-tax profit/loss for Mar 2021 by **GH¢1,526,076**. Also a series of such rises would increase the shareholders' equity by **GH¢29,614,718** whilst a series of such falls would decrease shareholders' equity by **GH¢29,614,718**.

The following significant exchange rates were applied during the year:

| | 2021 | 2021 | 2020 | 2020 |
|-----------|---------|--------|---------|--------|
| | GH¢ | GН¢ | GH c | GH c |
| | Selling | Buying | Selling | Buying |
| US Dollar | 5.8692 | 5.8634 | 5.7056 | 5.6998 |
| GB Pound | 7.9182 | 7.9097 | 7.3624 | 7.3545 |
| Euro | 6.7985 | 6.7918 | 6.6816 | 6.6756 |

4. Application of new and revised standards, amendments and interpretations

Amendments to References to the Conceptual Framework in IFRS Standards

The Group has adopted the amendments included in Amendments to References to the Conceptual Framework in IFRS Standards for the first time in the current year. The amendments include consequential amendments to affected Standards so that they refer to the new Framework. Not all amendments, however, update those pronouncements with regard to references to and quotes from the Framework so that they refer to the revised Conceptual Framework. Some pronouncements are only updated to indicate which version of the Framework they are referencing to (the IASC Framework adopted by the IASB in 2001, the IASB Framework of 2010, or the new revised Framework of 2018)

The Standards which are amended are IFRS 2, IFRS 3, IFRS 6, IFRS 14, IAS 1, IAS 8, IAS 34, IAS 37, IAS 38, IFRIC 12, IFRIC 19, IFRIC 20, IFRIC 22, and SIC-32.

Amendments to IFRS 3 Definition of a business

The Group has adopted the amendments to IFRS 3 for the first time in the current year. The amendments clarify that while businesses usually have outputs, outputs are not required for an integrated set of activities and assets to qualify as a business. To be considered a business an acquired set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs.

The amendments remove the assessment of whether market participants are capable of replacing any missing inputs or processes and continuing to produce outputs. The amendments also introduce additional guidance that helps to determine whether a substantive process has been acquired. The amendments introduce an optional concentration test that permits a simplified assessment of whether an acquired set of activities and assets is not a business. Under the optional concentration test, the acquired set of activities and assets is not a business if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar assets. The amendments are applied prospectively to all business combinations and asset acquisitions for which the acquisition date is on or after 1 January 2020.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

Amendments to IAS 1 and IAS 8 Definition of material

The Group has adopted the amendments to IAS 1 and IAS 8 for the first time in the current year. The amendments make the definition of material in IAS 1 easier to understand and are not intended to alter the underlying concept of materiality in IFRS Standards. The concept of 'obscuring' material information with immaterial information has been included as part of the new definition. The threshold for materiality influencing users has been changed from 'could influence' to 'could reasonably be expected to influence'. The definition of material in IAS 8 has been replaced by a reference to the definition of material in IAS 1. In addition, the IASB amended other Standards and the Conceptual Framework that contain a definition of 'material' or refer to the term 'material' to ensure consistency.

New and revised IFRS Standards in issue but not yet effective

At the date of authorisation of these financial statements, the Company has not applied the following new and revised IFRS Standards that have been issued but are not yet effective

IFRS 10 and IAS 28 (amendments) Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

Amendments to IAS 1 Classification of Liabilities as Current or Non-current

Amendments to IAS 16 Property, Plant and Equipment—Proceeds before Intended Use

Amendments to IAS 37 Onerous Contracts – Cost of Fulfilling a Contract

Annual Improvements to IFRS

Standards 2018-2020 Cycle Amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 9 Financial Instruments, IFRS 16 Leases, and IAS 41 Agriculture

IFRS 17 Insurance Contracts

IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes IFRS 4 Insurance Contracts.

IFRS 17 outlines a general model, which is modified for insurance contracts with direct participation features, described as the variable fee approach. The general model is simplified if certain criteria are met by measuring the liability for remaining coverage using the premium allocation approach.

The general model uses current assumptions to estimate the amount, timing and uncertainty of future cash flows and it explicitly measures the cost of that uncertainty. It takes into account market interest rates and the impact of policyholders' options and guarantees.

In June 2020, the IASB issued Amendments to IFRS 17 to address concerns and implementation challenges that were identified after IFRS 17 was published. The amendments defer the date of initial application of IFRS 17 (incorporating the amendments) to annual reporting periods beginning on or after 1 January 2023. At the same time, the IASB issued Extension of the Temporary Exemption from Applying IFRS 9 (Amendments to IFRS 4) that extends the fixed expiry date of the temporary exemption from applying IFRS 9 in IFRS 4 to annual reporting periods beginning on or after 1 January 2023.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

IFRS 17 must be applied retrospectively unless impracticable, in which case the modified retrospective approach or the fair value approach is applied.

For the purpose of the transition requirements, the date of initial application is the start if the annual reporting period in which the entity first applies the Standard, and the transition date is the beginning of the period immediately preceding the date of initial application.

Amendments to IFRS 10 and IAS 28 – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the re-measurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture. The effective date of the amendments has yet to be set by the Board; however, earlier application of the amendments is permitted. The directors of the Company anticipate that the application of these amendments may have an impact on the Company's consolidated financial statements in future periods should such transactions arise.

Amendments to IAS 1 - Classification of Liabilities as Current or Non-current

The amendments to IAS 1 affect only the presentation of liabilities as current or non-current in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items.

The amendments clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the reporting period, and introduce a definition of 'settlement' to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.

The amendments are applied retrospectively for annual periods beginning on or after 1 January 2023, with early application permitted.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

Amendments to IFRS 3 - Reference to the Conceptual Framework

The amendments update IFRS 3 so that it refers to the 2018 Conceptual Framework instead of the 1989 Framework.

They also add to IFRS 3 a requirement that, for obligations within the scope of IAS 37, an acquirer applies IAS 37 to determine whether at the acquisition date a present obligation exists as a result of past events. For a levy that would be within the scope of IFRIC 21 Levies, the acquirer applies IFRIC 21 to determine whether the obligating event that gives rise to a liability to pay the levy has occurred by the acquisition date.

Finally, the amendments add an explicit statement that an acquirer does not recognize contingent assets acquired in a business combination.

The amendments are effective for business combinations for which the date of acquisition is on or after the beginning of the first annual period beginning on or after 1 January 2022. Early application is permitted if an entity also applies all other updated references (published together with the updated Conceptual Framework) at the same time or earlier.

Amendments to IAS 16 - Property, Plant and Equipment—Proceeds before Intended Use

The amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced before that asset is available for use, i.e. proceeds while bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Consequently, an entity recognises such sales proceeds and related costs in profit or loss. The entity measures the cost of those items in accordance with IAS 2 Inventories.

The amendments also clarify the meaning of 'testing whether an asset is functioning properly'. IAS 16 now specifies this as assessing whether the technical and physical performance of the asset is such that it is capable of being used in the production or supply of goods or services, for rental to others, or for administrative purposes.

If not presented separately in the statement of comprehensive income, the financial statements shall disclose the amounts of proceeds and cost included in profit or loss that relate to items produced that are not an output of the entity's ordinary activities, and which line item(s) in the statement of comprehensive income include(s) such proceeds and cost.

The amendments are applied retrospectively, but only to items of property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after the beginning of the earliest period presented in the financial statements in which the entity first applies the amendments.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

The entity shall recognise the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at the beginning of that earliest period presented.

The amendments are effective for annual periods beginning on or after 1 January 2022, with early application permitted.

Amendments to IAS 37 - Onerous Contracts—Cost of Fulfilling a Contract

The amendments specify that the 'cost of fulfilling' a contract comprises the 'costs that relate directly to the contract'. Costs that relate directly to a contract consist of both the incremental costs of fulfilling that contract (examples would be direct labour or materials) and an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract). The amendments apply to contracts for which the entity has not yet fulfilled all its obligations at the beginning of the annual reporting period in which the entity first applies the amendments. Comparatives are not restated.

Instead, the entity shall recognise the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings or other component of equity, as appropriate, at the date of initial application.

The amendments are effective for annual periods beginning on or after 1 January 2022, with early application permitted

Annual Improvements to IFRS Standards 2018–2020

The Annual Improvements include amendments to four Standards.

IFRS 1 First-time Adoption of International Financial Reporting Standards

The amendment provides additional relief to a subsidiary which becomes a first-time adopter later than its parent in respect of accounting for cumulative translation differences. As a result of the amendment, a subsidiary that uses the exemption in IFRS 1:D16(a) can now also elect to measure cumulative translation differences for all foreign operations at the carrying amount that would be included in the parent's consolidated financial statements, based on the parent's date of transition to IFRS Standards, if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary. A similar election is available to an associate or joint venture that uses the exemption in IFRS 1:D16(a).

The amendment is effective for annual periods beginning on or after 1 January 2022, with early application permitted.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

IFRS 9 Financial Instruments

The amendment clarifies that in applying the '10 per cent' test to assess whether to derecognise a financial liability, an entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf.

The amendment is applied prospectively to modifications and exchanges that occur on or after the date the entity first applies the amendment.

The amendment is effective for annual periods beginning on or after 1 January 2022, with early application permitted.

IFRS 16 Leases

The amendment removes the illustration of the reimbursement of leasehold improvements. As the amendment to IFRS 16 only regards an illustrative example, no effective date is stated.

IAS 41 Agriculture

The amendment removes the requirement in IAS 41 for entities to exclude cash flows for taxation when measuring fair value. This aligns the fair value measurement in IAS 41 with the requirements of IFRS 13 Fair Value Measurement to use internally consistent cash flows and discount rates and enables preparers to determine whether to use pretax or post-tax cash flows and discount rates for the most appropriate fair value measurement.

The amendment is applied prospectively, i.e. for fair value measurements on or after the date an entity initially applies the amendment. The amendment is effective for annual periods beginning on or after 1 January 2022, with early application permitted.

Impact of the initial application of Covid-19-Related Rent Concessions Amendment to IFRS 16

In May 2020, the IASB issued Covid-19-Related Rent Concessions (Amendment to IFRS 16) that provides practical relief to lessees in accounting for rent concessions occurring as a direct consequence of COVID-19, by introducing a practical expedient to IFRS 16. The practical expedient permits a lessee to elect not to assess whether a COVID-19-related rent concession is a lease modification. A lessee that makes this election shall account for any change in lease payments resulting from the COVID-

19-related rent concession the same way it would account for the change applying IFRS 16 if the change were not a lease modification.

The practical expedient applies only to rent concessions occurring as a direct consequence of COVID-19 and only if all of the following conditions are met:

a) The change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change;

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

- b) Any reduction in lease payments affects only payments originally due on or before 30 June 2021 (a rent concession meets this condition if it results in reduced lease payments on or before 30 June 2021 and increased lease payments that extend beyond 30 June 2021); and
- c) There is no substantive change to other terms and conditions of the lease. In the current financial year, the Group has applied the amendment to IFRS 16 (as issued by the IASB in May 2020) in advance of its effective date.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

5. Segment information

Segmental information is presented in respect of the Company's business segments. The primary format and business segments, is based on the Company's management and internal reporting structure.

The Company's results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

The Company does not have a geographical segment.

The non-life insurance business is organised into four segments as shown above.

Notes to the Unaudited financial statements For the period ended 30 Sept, 2021

- i) Motor: This business unit underwrites motor insurance by giving cover which indemnifies the insured against any accidental loss to motorbikes and vehicles. There are three types of motor insurances namely; comprehensive, third party and third party fire & theft.
- ii) Marine & Aviation: Marine insurance provides cover on airborne cargoes, ships, fishing vessels as well as ports & harbours installations. Aviation on the other hand covers aircrafts itself, cargo and passengers.
- iii) Fire: Fire insurance covers accidental destruction of properties including household buildings, personal effects, commercial and industrial buildings, plants & machinery, raw materials, finished goods and profits (business disruption) policies. Fire cover is usually in three parts, namely; fire, lighting, and limited explosions.
- iv) Accident: Accident policies covers a broad range of activities including personal accidents, family personal accidents, group personal accidents, burglary, cash-in-transit, goods-in-transit, bankers indemnity, pedals cycle, products liability, contractors all-risk, travel insurance, bonds etc.

The business segments operates on a short-term insurance cycle.

Claims provision

The company's outstanding claims provision includes notified claims as well as those incurred but not yet reported. Due to the short term nature of the business, it is not considered necessary to discount any of the claims provision.

Claims provisions are based on previous claims experience, knowledge of events, terms and conditions of relevant policies and interpretation of circumstances. Each notified claim is assessed on a separate case-by- case basis with regard to specific circumstances, information available from the insured and the loss adjuster and past experience of similar claims. The company employs staff experienced in claims handling and rigorously applies standardized policies and procedures around claims assessment.

| | ======== | ======== |

Included in Ghana Gov't Treasury bill is a statutory deposit of GHS 5,831,032.54(2020: GHS 5,352,545.07)

The statutory deposit represents an escrow agreement between the National Insurance Commission (NIC) and SIC Insurance Company Limited. As part of the conditions for granting an Insurance license to 'the company", the NIC required "the company" to deposit 10% of its minimum capital as a statutory deposit into an escrow account. These instruments are carried at purchase amount plus any accrued interest and the investments are available for the day to day running of the company on approval by the regulator (NIC)
